Ahmad Hamad

Student at Birzeit University | Software engineer | Backend Engineer
Palestinian Authority

Summary

I'm Ahmad Hamad. I'm a passionate software engineer who loves building dynamic web applications. Currently, I'm in my final semester studying Computer Engineering at Birzeit University in Palestine. At the moment, I'm interning with Ilinix Company, deepening my skills in cloud computing and preparing for AWS certifications. Previously, I interned with 525k Company as a backend engineer, where I honed my skills in building scalable and robust systems. I'm excited to bring my enthusiasm, technical know-how, and innovative mindset to projects that drive business success.

Experience

525K

Back End Developer

July 2024 - November 2024 (5 months)

Ramallah, West Bank

- Developed and maintained backend services using Strapi and Spring Boot, implementing REST APIs with proper HTTP methods and status codes.
- Integrated PostgreSQL as the primary database, optimizing queries, ensuring data integrity, and securing applications with OAuth (Google, GitHub).
- Utilized Docker for containerization and basic CI/CD pipelines to automate build & deployment processes.
- Collaborated on the user interface with Tailwind CSS for styling, ensuring seamless integration with backend services.
